

HSM PET FluidEx 600

Quickly and reliably, the HSM PET FluidEx 600 empties full PET bottles and cartons / cans or drink which have been incorrectly filled or labelled or in situations where the minimum shelf life has been exceeded. The containers thrown in via the loading funnel are pulled in by the 2-roller mechanism and almost completely emptied. Small pieces of plastic and labels are removed from the liquid using a filter system and the liquid is then discharged using a dedicated system. The hinged loading funnel means that the machine can be easily cleaned. A high performance, low space requirement and the possibility to integrate the machine into existing recycling processes are the decisive advantages of the HSM PET FluidEx 600.

Technical data

Order number:	1985134	Throughput per hour PET bottles (1 litre):	10000
Dimensions of machine (WxDxH):	1215 x 3304 x 1775 mm	Working width:	600 mm
Infeed height:	1270 mm		

Product Information:

Ideal as compliment to the HSM baling presses

Both manual and automatic filling possible

Intuitive, multilingual operational guidance via graphic description

Throughput per hour up to 10 000 PET bottles (1 litre)

Specific discharge system for liquids via hose or pump

Perforation of full PET bottles, carton based packaging containers and cans

Very low space requirement thanks to compact and sturdy design

Easy to clean due to inspection door and hinged outlet chute

Cutting unit made of specially hardened steel, other machine frame parts made of stainless steel
