

HSM PET FluidEx 600

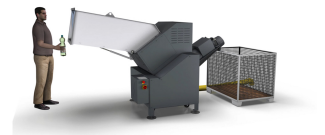

Quickly and reliably, the HSM PET FluidEx 600 empties full PET bottles and cartons / cans or drink which have been incorrectly filled or labelled or in situations where the minimum shelf life has been exceeded. The containers thrown in via the loading funnel are pulled in by the 2-roller mechanism and almost completely emptied. Small pieces of plastic and labels are removed from the liquid using a filter system and the liquid is then discharged using a dedicated system. The hinged loading funnel means that the machine can be easily cleaned. A high performance, low space requirement and the possibility to integrate the machine into existing recycling processes are the decisive advantages of the HSM PET FluidEx 600.

Product information

Perforation of full PET bottles, carton based packaging containers and cans

Both manual and automatic filling possible

Throughput per hour up to 10 000 PET bottles (1 litre)

Intuitive, multilingual operational guidance via graphic description
